(Journal of Molecular Structure, Vol. 210)

SUBJECT INDEX

Acetamidoxime
Cationic structures of acetamidoxime: theoretical analysis of H^+ and Li^+ complexes, 161

Allyl$^+$/F$^-$ and allyl$^-$/Li$^+$ ion pairs
A theoretical study of solvent effects on the relative thermodynamic stabilities of the allyl$^+$/F$^-$ and allyl$^-$/Li$^+$ ion pairs in polar media, 147

Ar$\cdots$Cl$_2$ (B) complex
A time-dependent approach to the intramolecular vibrational relaxation mechanism. An application to the Ar$\cdots$Cl$_2$ (B) complex, 227

B_2, B_2^+, B_2^{2+} and B_2^-
Doubly excited states of B_2, B_2^+, B_2^{2+} and B_2^-, 243

BC$\cdots$X$_n$ van der Waals clusters
Energetics of small BC$\cdots$X$_n$ van der Waals clusters. Application to I$_2\cdots$Ne$_n$ (n=1-3), 237

BeH$^+$ ($A^1\Sigma^+$-$X^1\Sigma^+$) band system
Theoretical transition probabilites and lifetimes for the BeH$^+$ ($A^1\Sigma^+$-$X^1\Sigma^+$) band system, 259

Biomolecules
GAMYR: a generalized version of AMYR for the study of biomolecules, 455

Boys-Foster criterion
Localization method for semiempirical molecular orbitals based on the Boys-Foster criterion, 107

Charge density
Quantum topological description of the charge density of the ON-NO$_2$ and ON-NSO molecules, 169

CO
A quantum chemistry approach to the electro-oxidation of CO adsorbed on Rh(111) cluster surfaces, 379
Theoretical study of the influence of the applied electric potential and the co-adsorption of water on the vibrational properties of CO adsorbed on Rh(111), 393

Coherent states
Density matrix of fermionic systems from coherent states via functional integrals, 39

Conjugation
On the conjugation in macrocycles: the electronic structure and spectrum of hemiporphyrazine, 267

Conjugative compounds
Large spin-dipolar long-range F-F coupling constants in conjugative compounds: their study using propagators, 205

Continuum model
MNDO and AM1 estimation of the electrostatic, induction and dispersion contributions to the solvation energy by a continuum model, 442

Density functional theory
Chemical reactivity in density functional theory: the N-differentiability problem, 29

Density functionals
Effective nuclear charges through the fitting of atomic polarizabilities with density functionals, 121

Diamagnetic spin-orbital contribution
Analysis of the diamagnetic spin-orbital contribution to indirect nuclear spin-spin coupling constants, 193

Differentiability problem
Chemical reactivity in density functional theory: the N-differentiability problem, 29

Dimethylamine
Potential-energy hypersurface for large-

amplitude coordinates in dimethylamine, 273

Effective nuclear charges
Effective nuclear charges through the fitting of atomic polarizabilities with density functionals, 121

Electro-oxidation
A quantum chemistry approach to the electro-oxidation of CO adsorbed on Rh(111) cluster surfaces, 379

Exponential propagation matrix
Application of the exponential propagation matrix method to the numerical solution of the Schrödinger equation, 45

F-F coupling constants
Large spin-dipolar long-range F-F coupling constants in conjugative compounds: their study using propagators, 205

Fermion pairs
On the electronic distribution for extended systems. Part II. Condensation and long-range-order correlations for fermion pairs, 99

Fermionic systems
Density matrix of fermionic systems from coherent states via functional integrals, 39

Formaldehyde
Comparison of semiempirical and BSSE corrected Møller-Plesset ab initio calculations on the direct addition of water to formaldehyde, 427

GAMYR
GAMYR: a generalized version of AMYR for the study of biomolecules, 455

Glutathione
Molecular modelling of glutathione: a comparison with crystallographic data, 469

H_2
H_2 on MoS_2: a molecular orbital study, 329

Hemiprophyrazine
On the conjugation in macrocycles: the electronic structure and spectrum of hemiporphyrazine, 267

Histamine H_2-anatogonists
Structure-activity relationships for histamine H_2-anatagonists, 447

HSSH and HXNS (X=O, S)
On the rotational isomerism of one rotor molecules. A comparative study of the HSSH and HXNX (X=O, S) series of molecules, 279

Hydrogen bond
Activation of the hydrogen bond by transition metals, 337

Hydrogen-bonded complexes
Theoretical studies of hydrogen-bonded complexes using semiempirical methods, 405

$I_2\cdots Ne_n$ (n=1-3)
Energetics of small $BC\cdots X_n$ van der Waals clusters. Application to $I_2\cdots Ne_n$ (n=1-3), 237

Infinite series representation
Sequence transformations for the efficient evaluation of infinite series representations of some molecular integrals with exponentially decaying basis functions, 71

Internal rotation
Ab initio study of internal rotation in 2-pyridincarboxaldehyde, 291
SCF-LCAO-MO study of the internal rotation and tilt angle in propyl fluoride, 299

Intramolecular vibrational relaxation mechanism
A time-dependent approach to the intramolecular vibrational relaxation mechanism. An application to the $Ar\cdots Cl_2(B)$ complex, 227

Kohn-Sham theory
Kohn-Sham theory and the representability problem, 9

Localization method
Localization method for semiempirical molecular orbitals based on the Boys-Foster criterion, 107

Lone-pair effect
Quantum chemical analysis of the orientational lone-pair effect on spin-spin coupling constants, 175

Macrocycles
On the conjugation in macrocycles: the electronic structure and spectrum of hemiporphyrazine, 267
Magnetic anisotropy effect
Molecular orbital theory: diagramatic representation of the contribution of the magnetic anisotropy effect on the magnetic shielding constant, 187
Magnetic shielding constant
Molecular orbital theory: diagramatic representation of the contribution of the magnetic anisotropy effect on the magnetic shielding constant, 187
Mesoscopic systems
Non-covalent interactions in bimolecular up to mesoscopic systems, 311
Methoxy- and methylene-dioxybenzene compounds
Theoretical and experimental study of the orientational oxygen lone-pair effect on $^1J(^3C-^1H)$ in methoxy- and methylenedioxybenzene compounds, 211
Methyl radical formation
Ab initio calculation of gas-phase methyl radical formation over $Mg^{2+}O^{2-}$ and Li^+O^- adsorption model sites, 325
$Mg^{2+}O^{2-}$ and Li^+O^- adsorption model sites
Ab initio calculation of gas-phase methyl radical formation over $Mg^{2+}O^{2+}$ and Li^+O^- adsorption model sites, 325
MNDO and AM1 estimation
MNDO and AM1 estimation of the electrostatic, induction and dispersion contributions to the solvation energy by a continuum model, 442
Molecular integrals
Sequence transformations for the efficient evaluation of infinite series representations of some molecular integrals with exponentially decaying basis functions, 71
Møller–Plesset ab initio calculations
Comparison of semiempirical and BSSE corrected Møller–Plesset ab initio calculations on the direct addition of water to formaldehyde, 427
Monocarbonyls
Electronic structure of metal monocarbonyls, 139
MoS_2
H_2 on MoS_2: a molecular orbital study, 329
Multi-reference configuration
Use of perturbed first-order density matrices in multi-reference configuration interaction expansions, 133

Natural orbitals
Generator coordinate Gaussian expanded natural orbitals, 63
Non-covalent interactions
Non-covalent interactions in bimolecular up to mesoscopic systems, 311
Nuclear spin–spin coupling constants
Analysis of the diamagentic spin–orbital contribution to indirect nuclear spin–spin coupling constants, 193

OH–NO_2 and ON–NSO molecules
Quantum topological description of the charge density of the ON–NO_2 and ON–NSO molecules, 169
Orthogonalized orbitals
A new methodology in quantum chemistry: use of partially orthogonalized orbitals, 1
Oscillator strengths
Oscillator strengths for XeII transitions, 253
Oxygen lone-pair effect
Theoretical and experimental study of the orientational oxygen lone-pair effect on $^1J(^3C-^1H)$ in methoxy- and methylenedioxybenzene compounds, 211

Perfluoroacetaldehyde
Ab initio study of the vibrational properties of perfluoroacetaldehyde, 305
Perturbed first-order density matrices
Use of perturbed first-order density matrices in multi-reference configuration interaction expansions, 133
Phase space
Photoionization in phase space, 221
Photoionization
Photoionization in phase space, 221
Polycyclic hydrocarbons
The properties of polycyclic hydrocarbons: on the theory of incremental methods, 111

Potential-energy hypersurface
Potential-energy hypersurface for large-amplitude coordinates in dimethylamine, 273
Propagators
Large spin-dipolar long-range F-F coupling constants in conjugative compounds: their study using propagators, 205
Propyl fluoride
SCF-LCAO-MO study of the internal rotation and tilt angle in propyl fluoride, 299
Pt(111) single-crystal cluster surfaces
Theoretical study of underpotential deposition of foreign metal atoms on Pt(111) single-crystal cluster surfaces. Part 1. The stability of the different metal underpotential-deposition layer structures as a function of surface coverage and applied electric potential, 353
Theoretical study of underpotential deposition of foreign metal atoms on Pt(111) single-crystal cluster surfaces. Part 2. The influence of metal underpotential deposition layer structures on the decomposition of co-adsorbed water, 365
Pyridincarboxaldehyde
Ab initio study of internal rotation in 2-pyridincarboxaldehyde, 291

Quantum chemistry
A new methodology in quantum chemistry: use of partially orthogonalized orbitals, 1

Representability problem
Kohn-Sham theory and the representability problem, 9
Rh(111)
Theoretical study of the influence of the applied electric potential and the co-adsorption of water on the vibrational properties of CO adsorbed on Rh(111), 393
Rh(111) cluster surfaces
A quantum chemistry approach to the electro-oxidation of CO adsorbed on Rh(111) cluster surfaces, 379
Rotational isomerism
On the rotational isomerism of one rotor molecules. A comparative study of the HSSH and HXNX (X=O, S) series of molecules, 279
Rydberg-Klein-Rees curves
Polynomial expressions for Rydberg-Klein-Rees curves of diatomic covalent molecules, 49

SCF-LCAO-MO study
SCF-LCAO-MO study of the internal rotation and tilt angle in propyl fluoride, 299
Schrödinger equation
Application of the exponential propagation matrix method to the numerical solution of the Schrödinger equation, 45
Si-containing compounds
The use of the SPPA method for the semi-empirical analyis of indirect spin couplings in Si-containing compounds, 199
Solvation energy
MNDO and AM1 estimation of the electrostatic, induction and dispersion contributions to the solvation energy by a continuum model, 442
Solvent effects
A theoretical study of solvent effects on the relative thermodynamic stabilities of the $allyl^+/F^-$ and $allyl^-/Li^+$ ion pairs in polar media, 147
Spin couplings
The use of the SPPA method for the semi-empirical analysis of indirect spin couplings in Si-containing compounds, 199
Spin distributions
Statistical population analysis of spin distributions for molecular systems, 93
Spin-spin coupling constants
Quantum chemical analysis of the orientational lone-pair effect on spin-spin coupling constants, 175
SPPA method
The use of the SPPA method for the semi-empirical analysis of indirect spin couplings in Si-containing compounds, 199
Statistical population analysis
Statistical population analysis of spin distributions for molecular systems, 93

Theory of incremental methods
The properties of polycyclic hydrocarbons: on the theory of incremental methods, 111
Thermodynamic stabilities
A theoretical study of solvent effects on the

relative thermodynamic stabilities of the allyl$^+$/F$^-$ and allyl$^-$/Li$^+$ ion pairs in polar media, 147

Transition metals
Activation of the hydrogen bond by transition metals, 337

Underpotential deposition
Theoretical study of underpotential deposition of foreign metal atoms on Pt(111) single-crystal cluster surfaces. Part I. The stability of the different metal underpotential-deposition layer structures as a function of surface coverage and applied electric potential, 353
Theoretical study of underpotential deposition of foreign metal atoms on Pt(111) single-crystal cluster surfaces. Part 2. The influence of metal underpotential deposition layer structures on the decomposition of co-adsorbed water, 365

Virial-type relations
Virial-type relations for arbitrary subsystems of particles belonging to a molecular system, 85

Wavefunction quality
Application of the distance between subspaces to the evaluation of wavefunction quality, 79

XeII transitions
Oscillator strengths for XeII transitions, 253
